From the authors’ announcement: “...this book is an example of a ‘literate program.’ Like *TeX: The Program* by D. E. Knuth (Addison-Wesley, 1986), this book is lcc’s source code and the prose that describes it. The code is presented in the order that best suits understanding, not in the order dictated by the C programming language. The source code that appears on the diskette is extracted automatically from the book’s text files. ... The distribution is available via ‘anonymous’ ftp from <ftp.cs.princeton.edu> (128.112.152.13) in the directory `pub/lcc`. ...
