US\$45.25. [From the publisher]: ... represents Knuth's final preparation for Volume 4 of *The Art of Computer Programming*. Through the use of about 30 examples, the book demonstrates the art of literate programming. Each example is a programmatic essay, a short story that can be read by human beings, as well as read and interpreted by machines. In these essays/programs, Knuth makes new contributions to the exposition of several important algorithms and data structures.
